

Domain Transfers

It is advisable to have all your domains with PlanetDomain, as this makes it easier to manager all your domains in one registrar.

In order to transfer over domains from another registrar to PlanetDomain's great system, please follow these instructions:

1. Before transferring a domain, make sure the domain is not current locked.
2. Make sure you get the valid authentication code from the current registrar of the domain.
3. Log into your Planet Domain Admin Panel
4. On your left panel under "domain administration", click "transfer domain"
5. Enter your domain name and your member ID number.
6. Click on transfer
7. An email will then be sent to you the registrant contact.
8. The email registered for the domain found on whois, must be current and active.
9. Once the email is received, you will need to read and approve the email using the link that is provided in the email.
10. Clicking on the link will take you a page where there is all the terms and conditions.
11. Please read this and confirm you agree to the terms.
12. Once you agree to transfer, you will need to input the auth code given by the previous registrar.
13. The auth code is set on the domain when it is registered.
14. The time taken for the transfer to be completed depends on the TLDs.
15. Gtlds – 5days, .au – 2days, .uk – 2days, .nz – 5days, .eu 5days.
16. Cost for transfer: Gtlds cost of a renewal, .au for free if it is not close to the expiry otherwise registration price, uk for free.
