

## **How to set up DNS for your reseller web site**

1. Log onto your admin panel
2. Create a C Name for your reseller host website.
3. If your name servers are ns1.planetdomain.com and ns2.planetdomain.com log on to your members account and click on advance DNS.
4. Click on the + sign of the domain you wish to host.
5. Click on modify Advance DNS.
6. Click add, and add a CNAME that will be pointed to [whitelabel.planetdomain.com](http://whitelabel.planetdomain.com)
7. Make sure there is a dot at the end of com.
8. Once this is done your reseller site will appear online.
9. From the admin panel click on edit website, to modify your private label website.
10. If your DNS host is different please contact your DNS hosting company and have it set up on their end.
