1. Editing your website.....	p3
2. Main Homepage.....	p3
3. Other Pages.....	p4
4. Custom StandAlone pages.....	p4
5. Modify Image Files.....	p5
6. Completed Websites.....	p6

## 1. Editing your website

When you click on Edit my website link in the planet domain admin panel, you will be displayed several different sections of your website to edit.

### Modify Site Config files

Modify Site Config Files	
Main webpage style sheets. Sets the 'Look' of the site.	Modify Reset
Short text description of the site.	Modify Reset
Keywords describing your site.	Modify Reset
Added to transaction pages to track Search Engine (ie Google) Conversions	Modify Reset
Gives a brief description (about_us.jsp) about your company.	Modify Reset

*Main WebPage Style Sheets* allow you to modify the CSS (cascading style sheets) that determine the look throughout the remaining pages of your site (ie the background and menu colours, font type and size, etc).

*Short Text Description* is basically the Meta Description (search engines use this info to display a brief explanation of your website in search results)

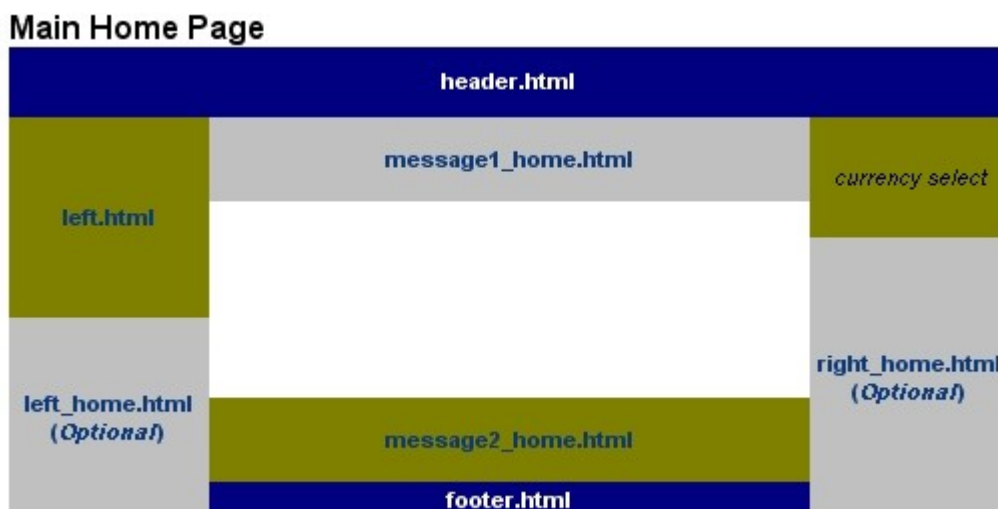

*Keywords* is essentially the key words related to your site which search engines use to locate your site.

*Transaction Pages* are used to track search engine conversions (ie, this is placed on the final confirmation screen after a customer has completed the transaction so you can determine if a click from Google generated a successful sale). See [www.googleadwords.com](http://www.googleadwords.com) for more information about search engine conversions and Google analytics etc.

*About us* is basically your mission statement, or an overview of your business operation.

## 2. Main Homepage

This is where you can modify individual components of our web template. The template is laid out in a specific format, and each of the areas on the site may be edited (with exception of currency select).

You may edit the various 'portions' of your website and add your own information or links.

Clicking on one of the sections will pop-up with a new window where the HTML code is displayed. You can change the code in this window, then save when you're done. As indicated earlier, you may choose to copy/paste this code into a WYSIWYG editor for easier manipulation. If you wish to make use of your own images, you will need to upload them to the server first (see "Modify Image Files").

The different sections under main home page are:

*header.html* is where you can modify the heading of your website (including logo placement etc).

*left.html* is where you may choose to place information on specials, or perhaps make your own quick links list or place other information.

*left\_home.html* is optional where you may choose to place additional info or links and logos

*currency select* cannot be modified. If you wish to change the default language and currency of your website, this can be done in the 'edit preferences' section.

*right\_home.html* is another optional section where you may wish to add extra information, links and logos

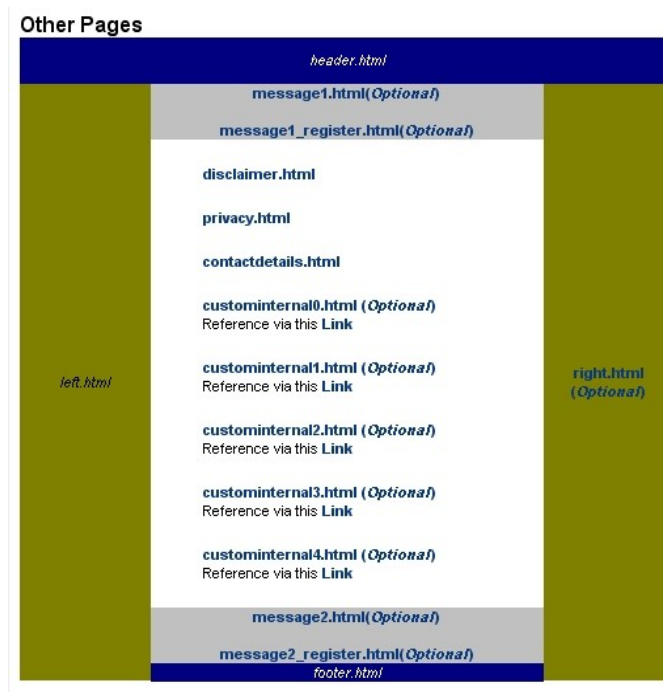

*message1\_home.html* is the main body of the site

*message2\_home.html* is an area where you may add additional info to the body of the site

*footer.html* includes the most-used links on our site, including links to legal and privacy information.

### 3. Other Pages

The other pages section allows you to create additional custom pages (which you may like to use for promoting your hosting services etc).

### 4. Custom StandAlone pages.

Use these pages if you'd rather do away with our template, and create your own custom pages that look different to our own. Please be aware that by creating your own custom page, we are unable to assist with tweaking it.

## 5. Modify Image Files

This section allows you to upload additional image files (such as your logo and other branding) to our server to be linked to your reseller page.

To upload a file, click the browse button next to 'add image file'. A window will pop up where you can browse your computer's hard disk to locate the file you wish to upload. Select the file and click 'open'. Now click the 'upload image' button. Repeat the process for all files you need uploaded to the server.

To delete a file, place a tick in the box next to the file you wish to delete, then click the 'delete files' button.

Note: you will be unable to delete the default/mandatory files which are required in our system by default.

### Modify Image Files

Below is a list of image files which you can use to support the above html files. These image files are common to all your language configurations so you can reuse images if you wish. You have a quota of 1000Kb.

To refer to an image in your site, ``, where 1000 is your reseller ID.

**NOTE** : please refer to the image by the root directory. If you try to refer to it via a relative path you will have problems. ie the following is wrong : ``

#### Add Image File

#### Uploaded Image Files

Type	Delete	File	Size				
Required	<input type="checkbox"/>	spacer.gif	0Kb	<input type="text"/>	<input type="button" value="Browse..."/>	<input type="button" value="Upload Image"/>	<input type="button" value="Reset"/>
Required	<input type="checkbox"/>	domain_people.gif	5Kb	<input type="text"/>	<input type="button" value="Browse..."/>	<input type="button" value="Upload Image"/>	<input type="button" value="Reset"/>
Required	<input type="checkbox"/>	i.hosting.gif	0Kb	<input type="text"/>	<input type="button" value="Browse..."/>	<input type="button" value="Upload Image"/>	<input type="button" value="Reset"/>
Required	<input type="checkbox"/>	email.gif	1Kb	<input type="text"/>	<input type="button" value="Browse..."/>	<input type="button" value="Upload Image"/>	<input type="button" value="Reset"/>
Required	<input type="checkbox"/>	redireccion.gif	1Kb	<input type="text"/>	<input type="button" value="Browse..."/>	<input type="button" value="Upload Image"/>	<input type="button" value="Reset"/>

**Total Website Size** : 619Kb  
*(Including all language translations)*

**Website Quota** : 1000Kb

**Please note:** the total available space for storing images on our server is 1MB, and the default installed files already occupy some of that space. Where possible, try compressing your images so that they fit within the 1MB quota, and can be loaded faster when viewed by people visit your site.

Once you've finalised your product pricing, and have edited your website to your liking, then you're ready to start selling to your customers and marketing your website.

## Completed Websites

Here are a couple of examples of reseller sites, giving you a basic idea of what you can achieve:

### Standard output

The screenshot shows a website template with a red navigation bar containing links: Home, Register, Manage Domain, Member Services, Transfers, Pricing, WhoIS, Contact Us, and Help. Below the navigation bar is a placeholder for a logo: "Your Logo Goes Here". The main content area features a large banner for "AMERICA'S INTERNET ADDRESS" with a star and ".US" logo, and the text "GET YOUR .US NAME TODAY! Click Here To Register!". Below the banner is a "Domain Search" section with three numbered steps: 1) Enter a name, word or phrase in the box below; 2) Select domain extensions from the list; 3) Click Go!. There is a search input field with "www." and a "Go!" button. Below the input field is a grid of domain extensions with checkboxes: .com, .net, .org, .biz, .info, .com.au, .net.au, .org.au, .asn.au, .id.au, .co.uk, .org.uk, .me.uk, .uk.com, .us.com, .us, .ca, .tv, .cc, .eu.com, and .de. At the bottom of the search section, it says "Save Time! Search for multiple domain names." On the right side of the page, there is a "Member Logon" section with fields for Username and Password, a Login button, and a Password Retrieval link. Below the logon section are links for "Change Currency" (set to United States Dollar) and "Change Language" (set to English), along with "Join Now" and "Renewals" buttons.

The above example is a typical output of the standard template.

### doominio.com

The screenshot shows the doominio.com website. The header features the doominio.com logo and a search bar for "Buscar Ayuda". The navigation bar includes links for "Registro de Dominios", "Alojamiento Web", "Plantillas Web", and "Contacto". The main content area is divided into several sections. On the left, there is a "Dominios" sidebar with links for "Registro de dominios", "Precios y descuentos", "Nuestras ventajas", "Clientes", "Administrar dominios", "Administrar cuenta", "Renovar dominio", "Transferir dominios", and "Soporte técnico". Below the sidebar is a "¡Compara precios!" section with a table of prices for various services: Nominalia (39,44 €), Acens (31,26 €), Arsys (29 €), Terra (25,52 €), and Doominio.com (12,95 €). The main content area features a large banner with a woman's face and the text "¡Registra ya tu dominio por solo 12,95 euros al año! Incluye redirección gratis (correo y web) y todos los extras como DNS, parking, etc. ¡No te quedes sin tu dominio!". Below the banner is a "Registro de Dominios" section with three numbered steps: 1) Introduce un nombre o palabra; 2) Elige una extensión (.com, .org, .net, etc) de la lista; 3) Pulsa ¡Buscar!. There is a search input field with "www." and a "¡Buscar!" button. Below the input field is a grid of domain extensions with checkboxes: .com, .net, .org, .biz, .info, .co.uk, .org.uk, .me.uk, .uk.com, .us.com, .us, .ca, .tv, .cc, .eu.com, and .de. At the bottom of the search section, it says "¡Ahorra tiempo! Busca varios dominios a la vez." On the right side of the page, there is a "Usuario" section with fields for "Usuario" and "Contraseña", a Login button, and a "Recuperar contraseña" link. Below the login section are links for "Cambiar Moneda" (set to Euro) and "Idioma/Language" (set to Español). At the bottom right, there are logos for "VISA", "MasterCard", "American Express", and "WorldPay" (TRUSTED WORLDWIDE). A blue circular badge at the bottom right says "MAS DE 9000 DOMINIOS REGISTRADOS".

As you can see from the Doominio example, the menus are different to the standard menus. Doominio has done a lot of work on making their website look like this. With some effort, you too can have a nice looking reseller site.

The more visually pleasing your site is, the more likely your customers are to register their domain with you.

Good luck with your new reseller website.
